

# Lead and Copper Plumbing Survey

At Warren County Utility District, we are committed to providing you with the best water service possible. All public water supply systems in the United States are required to identify the materials of service lines connected to the distribution system. To meet these requirements established by the U.S. Environmental Protection Agency (USEPA) and the State of Tennessee Department of Environment and Conservation (TDEC), we kindly request your assistance in completing a brief survey regarding the type of plumbing in your home.

Customer Name: \_\_\_\_\_

Customer Number: \_\_\_\_\_

Service Address: \_\_\_\_\_

- **What type of service line connects the home or business to the water meter?**

*Check all that apply:*

- Lead** (dull, dark gray. Easily scratched with hard object, shiny when scratched)
